

JAYE ENGELHARDT

Moncks Corner, SC | 757-470-6492 | jaye.engelhardt@gmail.com

PROFESSIONAL SUMMARY Cybersecurity professional and retired U.S. Navy Petty Officer with 20 years of experience supporting secure, mission-critical systems and operations. CompTIA Security+ certified with a strong foundation in security operations, incident analysis, system troubleshooting, and technical documentation. Seeking entry to mid-level cybersecurity roles.

CORE SKILLS

- **Cybersecurity & Operations:** Security Monitoring, Incident Triage, Risk Analysis, Policy & Procedural Compliance, Technical Documentation
- **Systems:** Windows, Linux, Virtualized Environments (conceptual)
- **Networking:** TCP/IP, DNS, Firewalls, Enterprise Networking
- **Tools:** Wireshark, Nmap, Microsoft Office, Visual Studio Code
- **Programming:** Python, C++, Bash (basic)

PROFESSIONAL EXPERIENCE

Associate Analyst I (Risk & Investigations) -AML RightSource (Apr 2025 - Jan 2026)

- Analyzed large datasets to identify anomalous activity and potential risk indicators.
- Conducted investigations and documented findings in accordance with strict procedural and quality standards.
- Followed defined escalation processes to ensure timely and accurate case resolution.

United States Navy - Fire Controlman First Class (Jul 1999 - Jul 2019)

- Supported and operated secure, mission-critical systems in high-risk and classified environments.
- Monitored systems for anomalies, diagnosed issues, and applied structured troubleshooting techniques.
- Developed and maintained technical documentation, improving system response times by 35%.
- Enforced procedural compliance, access controls, and operational security standards.
- Led and trained teams of up to 50 personnel in technical and operational procedures.

Field Technician - Charter Communications/Spectrum Enterprise (Aug 2019 - Jan 2020)

- Installed and troubleshooted enterprise network connectivity and customer systems.

EDUCATION

Bachelor of Science in Cybersecurity Charleston Southern University Minor: Criminal Justice | Applied Computing: Computer Programming
